

Publishing Process

Publishing content within the CMS follows these basic steps:

- 1. Create / Edit
- 2. Preview
- 3. Save
- 3.5 - Revision List
- 4. Publish & Confirm
- 5. Unpublish & Confirm
- 6. Delete (Back to top)

1. Create / Edit

To create content, click the desired 'Create' link in the [Admin Tools](#) menu

To edit content:

1. Use the [Content List](#) to find the item you wish to edit (or navigate directly to the item)
2. Click the **Edit**, **Edit Current**, or **Edit Latest** tab
 - Edit**: Appears only prior to first publish of content
 - Edit Current**: To edit the currently published version of the content
 - Edit Latest**: To edit the latest (unpublished) revision after the current published version

Whether creating or editing, you will be presented with the editable form of the current [Content Type](#) you are working with. Follow the type-specific instructions to make desired changes.

Choose from one of the buttons at the bottom of the page:

- **Save**: Use only if you are certain of your changes (see #3)
- **Preview**: View your changes before you save them (see #2)
- **View changes**: To view a side-by-side comparison of your changes against the current published or last saved version (see [Compare to current](#))
- **Delete all**: To permanently delete the content (and any revisions, if present)
NOTE: **DO NOT USE BEFORE READING #6, BELOW**

2. Preview

This renders a view of the content as it will be seen by the user (see exceptions, below). Scroll down to view another editable form of the content, where you can make further changes.

Preview exceptions - Save for true display

There are currently 2 main exceptions to the accurate display of the preview screen.

1. The Preview displays at full-width, which is not true for the final saved result
2. Certain HTML formatting displays in Preview, but not once saved.

In either case, saving the content produces the true final display and still allows further editing before publication.

3. Save

When you are satisfied with your content, click Save.

After saving your changes you will see the Revisions sub-menu:

- **List all revisions:** Lists all existing revisions for the content (see #6, below)
- **View:** Shows the content as the visitors will see it
- **Edit:** Shows the edit screen for the content
NOTE: This button is visible ONLY to Publishers and Admins
- **Publish:** Publishes the content
NOTE: This button is visible ONLY to Publishers and Admins
- **Compare to current:** Same as **View Changes** (see #1, above)
NOTE: See [Compare to current](#)

NOTE: For Non-Publishers and Non-Admins, clicking Save means they will no longer be able to edit that revision. These Member-level users may view the edited content, or create another revision based off the current published content, but they may not re-edit an existing revision. A Publisher or Admin must publish or edit that revision.

3.5 - Revision List

Click the **Revisions** or **Revision Operations** tab to show all revisions for the content. There are three states of revision:

1. Archived (grey color)
2. Published (yellow color)
3. Pending revision (pink color)

Click the hyperlinked date for a given entry to view and edit that entry.

USM Home > Department of Geosciences > Geoscience Resources > Revisions

Geoscience Resources is published. It has 10 revisions.

View current | Edit current | Edit latest | Revisions

Revisions allow you to track differences between multiple versions of your content, and revert back to older versions.
To edit, publish or delete one of the revisions below, click on its saved date.

DEPARTMENT OF GEOSCIENCES

Node Revision List

[Republish current revision](#) | [Delete all](#)

REVISION	ACTIONS	STATUS
Saved 2013-12-14 13:57 by william@bliss	Edit	in draft/pending publication
Saved 2013-10-08 14:36 by jldizen	Edit	current revision/published
Saved 2013-10-08 12:25 by jldizen	Edit	archived
Saved 2013-05-28 12:18 by jldizen	Edit	archived

Revert to previous published version

To revert to a previous revision, you actually edit, save and publish a new version of that previous revision:

1. Click the hyperlinked date of the desired revision
2. Edit the revision as desired
3. Click Save
4. Publish as normal

4. Publish & Confirm

This step is only available to Publishers and Admins.

Click **Publish** to bring up a confirmation screen.

Click **Publish** again to publish that content to the live USM site.

NOTE: If there is a currently published version, this new published version will take its place, and the older version will be archived.

Automatic publishing

It is possible to set content to be published (and unpublished) at a specific date and time in the future, for certain content types (see [Scheduling Content](#))

5. Unpublish & Confirm

This step is only available to Publishers and Admins.

Click **Unpublish** to bring up a confirmation screen.

Click **Unpublish** again to unpublish that content.

NOTE: This means that the content will not be visible to visitors. If this is content on the home page, such as Promo Items or Overview content, the space reserved for that content will appear empty. Unpublishing content does not automatically publish another version.

Automatic unpublishing

It is possible to set content to be unpublished (and published) at a specific date and time in the future. See [Scheduling Content](#).

6. Delete ([Back to top](#))

This step is only available to Publishers and Admins.

This function is available at the bottom of an item's edit screen and on the Revisions menu, and will permanently delete the selected content (and any of its revisions, if there are any)

Deleting = PERMANENT

THIS ACTION IS PERMANENT. ANY CONTENT DELETED FROM THE SYSTEM IS NOT RECOVERABLE.

WHEN IN DOUBT, UN-PUBLISH (see #5, above).
