

Galleries

Galleries are grouped collections of Gallery Images. You may create multiple galleries to suit your needs.

Gallery Image thumbnails display on a Gallery page, with a [Start Slideshow](#) button at the top which launches a modal popup to navigate through the gallery.

Unlike most other content types, Galleries require two separate steps:

Step 1: [Create the Gallery placeholder](#)

Step 2: [Add Gallery Images](#)

Don't forget to link it

Like some other content types, Galleries will not automatically appear on your site pages when you publish them. You will need to link to each Gallery from another page, from content on your department homepage, or from the sidebar navigation.

Engineering Expo 2011

Below are some photos from our Engineering Expo 2011 on October 15th.

Thanks again to everyone who attended. The turnout was great and the grad students were able to show off the exceptional work they've been doing for the past few years.

Gallery Slideshow

Clicking the Start Slideshow link will launch an in-browser slideshow, with the following options:

- **View Image Details:** Closes slideshow and opens same window with image, title and description
- **View Full Size:** Closes slideshow and opens new window with full-sized image
- **"X":** Close the slideshow
- **"||":** Pause the slideshow
 - When paused, this image will change to a "Play" button (right-facing triangle) to resume slideshow
- **"<", ">":** Hovering over image will reveal arrows to move forward or backward through slideshow

Slideshows currently show only the images on the current page, not the entire gallery.
