

# Catalog Degree Supplemental

Catalog Degree Supplemental is the umbrella term for content that is related to a specific degree (often of a marketing or recruiting nature), but is not considered part of the contract agreement between the student and the school. Therefore, this content may be credited, edited and deleted at any time, **regardless of the current stage of the Catalog** process.

Currently, there are two separate 'Supplemental' elements:

1. [Learn More](#)
2. [Career Options](#)

Because this content is not considered part of the student contract, it will only appear within the department site. In the catalog section, these two areas will not be visible.

### MS in Nursing - Education

The Master of Science in Nursing presents a vibrant, challenging, future-oriented program of study that prepares graduates for practice in diverse health care settings. Coursework builds on the baccalaureate degree in nursing and is based on theory and research in nursing and related disciplines.

The program provides the foundation for continued professional development and for doctoral study. Students are prepared to provide leadership and initiate collaborative relationships with others for the purposes of improving nursing and health care and influencing health policy. Master's students in nursing gain skill and knowledge that builds on their clinical experience and generalist undergraduate preparation.

Graduate students extend their clinical expertise in working with individuals, families, and high risk populations. Master's students gain skills in clinical decision making and differential diagnosis; in case management and consultation; in client/patient teaching; in assessments and interventions; and in program design, implementation, and evaluation.

Requirements   Admission   Course Sequence   **Learn More**

This content is editable at any time, regardless of the Catalog Life Cycle and may include whatever content is desired. Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.

### CAREER OPTIONS

This degree can lead to a wide variety of potential occupations, including:

- Registered Nurse
- Nursing Instructor
- Nursing Administrator

## Learn More - ([back to top](#))

Use the [Text Editor](#) to enter whatever content is desired.

This content will appear in a 'Learn More' tab following the other contract-level tabs (Requirements, Course Sequence, Admissions). The type of content is entirely up to you and can range from descriptions of current trends in the field to photos of current students using the degree to videos.

As always, remember that the Internet is a different reading experience, so text should:

- Use shorter paragraphs (shorter sentences, simpler language)
- Use audience-focused language (benefits to students, specific outcomes, etc.)
- Integrate images or other graphics judiciously

If no content is entered here, the Learn More tab will not appear.

## Career Options - ([back to top](#))

Use the [Text Editor](#) to present information about potential career opportunities.

This information appears in a special box on the right side of the main content. This box will expand downwards to accommodate whatever text is included, but it is best to keep this information concise.

If desired, expanded information can exist on a separate [Page](#), which can be linked from within the Course Options box, using the [Internal Link](#) feature.

If no content is entered here, the Career Options box will not appear.
