How to Enter Time - Hourly COVID

Description: COVID Leave is used in accordance with the Chancellor’s message at 4pm on 3/19. The new COVID time reporting code will be used by regular employees to report regularly scheduled hours not worked due to the COVID Coronavirus pandemic March 15th through April 4th. COVID Leave is compensated at straight pay and should be entered for regularly scheduled hours in which employees are not able to work. Unlike Administrative Leave, employees will not receive both straight pay for the time worked as well as COVID leave pay. Additional pay is not granted to employees who were not scheduled to work March 15th through April 4th. COVID Leave will not deduct hours from your sick leave balance.

Excerpt from Chancellor’s Message Dated 3/19/20:
Please continue to work remotely if possible or as part of our limited on-campus presence as already planned with your supervisor. However,

• if you are unable to work due to the temporary suspension or reduction of your department operations;
• if you need to be away from work to tend to children who are home from school or daycare;
• if you are following self-quarantine guidelines,
• if you are ill or tending to a family member who is ill;
• or if you simply need time away from work to tend to matters that you are confronting due to the crisis,

you will continue to be paid through April 4, and there is no need to utilize sick leave or vacation time for these reasons.

Staying Home During the Leave:
Employees normally not scheduled to work will not receive any additional pay and should not report time for that period.

Working During the COVID Leave Period:
Employees working during the leave period need to properly enter their time so they are correctly compensated. Time worked, even if it was remote, should still be entered as Regular. Time not worked should be entered as COVID.

Working Over Schedule during COVID Leave:
When an employee works over their normal schedule March 15th through April 4th, any hours worked in excess of their normal schedule should be compensated at the normal overtime rate. All hours should be reported as Regular.

If an employee was not able to keep their normal schedule for one or more days or shifts, COVID should only be used to make them whole as it relates to their normal schedule. For example, if an employee who normally works 8 hours a day and was unable to work 6 hours and able to work 2 hours on 3/18 and then was able to work 9 hours on 3/19, should only report 5 hours of COVID to make them whole for the week.

Working During the Leave Period and Saving Compensatory Time
Since COVID would replace regular hours worked, there should not be an impact on compensatory time.
