Allow or block cookies for a specific site
If you allow cookies by default, you can still block them for a certain site.

1. On your computer, open Chrome.
2. At the top right, click More ▪ ▪ ▪
   > Settings.
3. At the bottom, click
   Advanced.
4. Under “Privacy and security,” click Content settings
   > Cookies.
5. Next to “Block,” “Clear on exit,” or “Allow,” click
   Add.
6. Enter the web address.
   - To create an exception for an entire domain, insert
     [*] before the domain name. For example,
     [*].google.com will match
     drive.google.com and
     calendar.google.com. (use hoonuit.com)
   - You can also put an IP address or a web address that doesn't start with
     http://.
7. Click Add.
