Allow or block cookies for a specific site
If you allow cookies by default, you can still block them for a certain site.

1. On your computer, open Chrome.
2. At the top right, click More.
3. At the bottom, click Advanced.
4. Under “Privacy and security,” click Content settings
5. Click Cookies.
7. Enter the web address.
   - To create an exception for an entire domain, insert [*] before the domain name. For example, 
     [*].google.com will match drive.google.com and calendar.google.com. (use hoonuit.com)
   - You can also put an IP address or a web address that doesn't start with http://.
8. Click Add.
