Allow or block cookies for a specific site
If you allow cookies by default, you can still block them for a certain site.

1. On your computer, open Chrome.
2. At the top right, click More → Settings.
3. At the bottom, click Advanced.
6. Enter the web address.
   • To create an exception for an entire domain, insert [*] before the domain name. For example, [*].google.com will match drive.google.com and calendar.google.com. (use hoonuit.com)
   • You can also put an IP address or a web address that doesn't start with http://.
7. Click Add.
