How to Access a Blackboard Organization

When you first log in to Blackboard, select the Community tab. You can search for organizations or browse the full list of available organizations in your institution. A list of organizations you've already joined also appears on this page.

After you search or browse for organizations, a list of matching and available organizations appears. To join an available organization, open the organization's menu and select Enroll.

You can select an organization to view its home page. You need to be a member before you can see all of the content and tools available in an organization.

Organizations look and feel just like courses. You can use many of the same tools that you use in courses, but the organization leader or your administrator decides which tools you can access.

OR

From your home page in Blackboard, locate My Organizations, and select the one with which you wish to work.
