Windows Presentation Mode

Security policy calls for screen savers to turn on after 30 minutes of inactivity. Although the user can easily avoid the screen saver turning on in the middle of a class or presentation by turning on Presentation Mode.

To turn on Presentation mode, press the Windows key + x, then click the button Turn On just above Presentation Settings.

To adjust Presentation mode settings, in the Start search box type “presentation” to pull up adjust

Then configure as desired.
I am currently giving a presentation

When giving a presentation, your computer stays awake, system notifications are turned off, and the following settings are applied. Tell me more about presentation settings.

When I am giving a presentation:

- Turn off the screen saver
- Set the volume to:
  - Low
  - High
- Show this background:
  - (None)
  - BGInfo
  - img0
  - img1

Browse...
Position: Fit to screen
